

EDF MHD ZEV Supply Chain Database

Sep 2021

Disclaimer:

The material included herein is meant to provide a best efforts attempt to capture and display the current state of the MHD ZEV supply chain in the United States and is not meant to capture every company and every location in the supply chain with complete accuracy.

This database does not represent an endorsement of any particular project or company. Any project or company involved in this sector must comply with state and federal laws, and inclusion of corporate information or recognition in this analysis should not be construed as meeting that standard.

This information is distributed for general informational and educational purposes only and is not intended to constitute legal, tax, accounting or investment advice. EDF and its contractor(s) who were involved in collecting the data disclaim any responsibility, liability, or duty of care to any other person or entity based upon this material.

The information contained herein is current only as of the date of publication and may be subject to change at any time without prior notice. Any reference to an investment's past or potential performance is not, and should

Side notes:

This spreadsheet is meant to act as a companion to a series of maps that display most, if not all, of this information. Further, this information was used to create one or more reports and presentations. Due to these various pieces of material having different dates of publication, and the fact that information continues to be updated up until the date of publication in order to capture changes in the MHD supply chain, it is likely that some differences will exist between materials that are published at different times.

Several cells in the database have the reference N/D - this denotes "No data found."

Also, several cells have a hyperlink to the underlying data displayed. While those hyperlinks are the source to some of the data, they do not represent the sole source of information obtained for this project. The author further makes no representations that those hyperlinks are still working or have not been corrupted by some external factors. Please use your best judgement and sufficient safeguards when clicking on external links, the author is not responsible for any damage that may incur.
